

BLOOD STICKS NEW & EXCLUSIVE TO GEELONG FIREWORKS

It is used by haunt, theatrical, and movie industry professionals on props, clothing, and stage decor to create a bloody effect without staining like regular stage blood. Provide a 3D blood effect. Not to be used directly on body as the melted blood is extremely hot. Use caution. Sold by pack, 6 blood sticks per pack. (Looks like regular glue sticks, operates in regular glue gun) **NOTE: BEING USED ON MANEKIN IN PHOTO AT RIGHT. DO NOT USE ON SKIN!**

Used in any regular household glue gun (extremely hot when it initially melts, so be careful). Can also be melted in a crock-pot. Does not stain clothing, simply comes out in regular wash.

Can be smeared on props, clothing etc. Dries quickly, and has a 3D effect to it, unlike stage blood which soaks into the clothing. Create blood

effects with Blood Sticks. Simply put sticks in pot and melt on low temperate, then pour onto surface to create blood flow. Weather proof. Can be used outside in any type of weather. Re-Useable.

Instructions for severed hand are available free with any

order of Blood Sticks. JUST ASK!

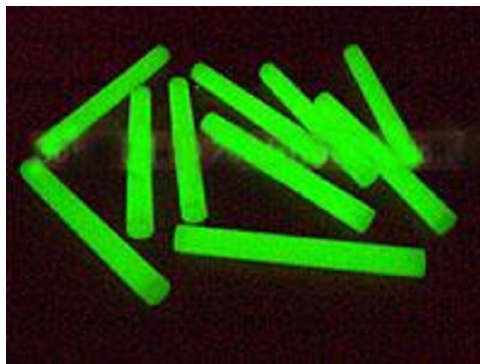

Blood Sticks are incredibly tough and will hold onto almost any prop or material. Pack of 6 \$8.00 Bulk pricing available.
