

Your order contains coloured smoke cartridges for a GENDER REVEAL.

As mentioned on our website, the outside of the white tube WILL have blue/red streaks and the end of the tube is OPEN, so you will see the color.

- 1) Get a friend to light the cartridge in a tin can. Small cans, like baked bean tins are great. Put some sand etc. in bottom of the can, around 3 cm. and push the smoke tube in. Light the color top with a BLUE FLAME (jet flame) LIGHTER. You can also spray paint the can black or any color you like. Ensure it is FULLY dry before using.
- 2) You can wrap the tube in wrapping paper. Just cut a piece and roll the tube in the paper and sticky tape along the seam. DO NOT wrap the entire tube with ANY type of tape, such as sticky tape, PVC electrical, Gaffa etc.
- 3) For the top, cut a circle about 2 -3 times the diameter of the tube.
- 4) Place centrally over the color top, and press over the tube.
- 5) Then tape around the tube, thereby holder the paper top in place.
- 6) DO NOT TAPE ACROSS THE TOP OF THE TUBE!!
