

For you wedding day, we offer:

**INDOOR FIREWORKS** - known as pyrotechnics. We offer silver indoor pyrotechnics as well as silver changing to gold fireworks.

New technology – **SPARKULAR** – The Fireworks Machine. Safe to use, but best of all multiple firing. The same units can be fired multiple times.

Our units have their own power packs. Other operators run power cords from the nearest wall to the first unit, then daisy chain them. Tripping hazard and not a good look. Ours are genuine SPARKULAR machines, beware of cheaper copies that run hotter!! DJ insurance does not cover these machines. We have specific insurance cover for Sparkular.

**FOG** – genuine low level fog. Not a normal fog machine running over ice cubes .... which as it gets warm it rises up....bye bye bride and groom.

We use Liquid Nitrogen Fog – the only wedding provider to do so. We have stock – we never run out for your day. Best of all – **NO MOISTURE ON THE FLOOR** – especially important with porcelain/marble floors! And our exclusive Wedding Cake Fire and Ice Effect....fog cascading over your cake with miniature pyrotechnics!

**CO2 GUNS** – these are amazing. Either for your entrance or at the bridal table. One each! Available in Basic Black or our **PREMIUM GOLD GUNS!**

**CO2 JETS** – think major stage events.... These blast jets up to 8 metres, with dazzling colour. Great for your entrance when we fire these horizontally along the floor.

**INDOOR WATERFALL** – a beautiful entrance effect. Slow cascading fall of silver fireworks as you make your entrance. We use **GENUINE WATERFALL EFFECTS** unlike others. Ask us about what others use!

**CAKE FIREWORKS** – small 45 second fountains on your cake table – cut the cake and these are fired remotely. Plenty of photo time for your photographer and guests to get the shots. With our mini-foggers we can give your cake cutting the Fire and Ice effect ...mini fog and mini fireworks.

**CONFETTI** – ALWAYS check with your venue. Some do not allow it at all. Some will charge a cleanup fee. If they do allow it = **WOW** = We use industrial standard confetti shooters. **YOUR** choice of colours!

**COLOURED SMOKE** – Get your photographer to contact us, or you can buy and use these yourself. Not restricted! Blue, Red (pink), Orange, Yellow, White, Green, Dark Grey. **Outdoor Use ONLY!**

**SPARKLERS** - Yes, we have them! 70cm – 3 minute; 90cm – 4 minute; 10cm diameter **HEART** shaped, 1 minute. Great for departures. These are not toy-shop sparklers. Ours are made at the same factory that make our display fireworks.

**FLAME EFFECTS** – if your venue has sufficient ceiling height we can offer knock out flame effects on your entrance or during your dance. Besides “yellow flames” we offer **GOLDEN FLAMES, RED FLAMES, GREEN FLAMES** and ethereal **BLUE FLAMES**. Straight up, \\/ jets and our 4 colour units! For outdoors we have our massive **FLAME WEVERS** Giant Jets of Flame.

**OUTDOOR DISPLAYS** – Nothing says **WOW** like our outdoor fireworks displays. Available at selected venues.

Geelong Fireworks – 20+ years experience, \$20 million insurance (we have never claimed nor had an incident in our history)

You deal directly with Steve Lawrence, Director and Pyrotechnician at all times!

**NOW is the time to talk to use about your wedding fireworks.**
